Assignment (1)

For each of the following tasks, classify the **task environment** according to the six standard PEAS-related properties used in artificial intelligence:

- **Fully observable** vs **Partially observable**
- **Deterministic** vs **Stochastic**
- **Episodic** vs **Sequential**
- **Static** vs **Dynamic**
- **Discrete** vs **Continuous**
- **Single-agent** vs **Multi-agent** (and if multi-agent it's benign or adversarial)

Tasks to classify:

1. Natural language processing for real-time translation in a video conference.
2. Shopping for used AI books on the Internet.
3. Playing a tennis match
4. Bidding on an item at an auction.
5. Practicing tennis against a wall.
6. Robot part picking
